DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a method of managing a multi-vendor online sales channel that receives an order through a unified storefront and that takes flash title prior to fulfilling the order, classified in class 705, subclass 26.
- II. Claims 22-27, drawn to a method that provides a set of conditions for service for a plurality of sellers, classified in class 705, subclass 26.
- III. Claims 28-31, drawn to an online sales channel that determines a sales tax liability at a point of sale based on the residence of the entity, classified in class 705, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of managing a multi-vendor online sales channel that receives an order through a unified storefront and takes flash title prior to fulfilling the order but does not require providing a set of conditions for service for a plurality of sellers as required in invention II. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of managing a multi-vendor online sales channel that receives an order through a unified storefront and takes flash title prior to fulfilling the order but does not require determining a sales tax liability at a point of sale based on the residence of the entity as required in invention III. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method that does not require determining a sales tax liability at a point of sale based on the residence of the entity as required in invention III. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Dwight U. Thompson on January 4, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
